

## EnergyElite Cardlock & Credit Cards

If your business includes servicing dealer accounts, consignment customers or operating c-stores, you know the complexity involved in accepting and reconciling credit card transactions, especially oil company credit cards that are presented for payment .

### Cardlock Features

- ◆ Fully functional card, driver and vehicle control to include limits on products, day/time of use, unit and dollar limits.
- ◆ Provides the ability to import from an unlimited number of networks
- ◆ Full integration into accounts receivable
- ◆ Accounting controls in place for data imports for unbilled transactions (the control account)
- ◆ Allows for flexible billing cycles by customer

### Credit Card Features

- ◆ Electronic interface to DTN Credit Card reimbursements with reconciliation tools
- ◆ Tracking of customer and store POS identification
- ◆ Provisions for POS and manual credit card transactions
- ◆ Ability to post credit card transactions, both POS and manual, as payments from customers in payment application screen
- ◆ Full integration to the General Ledger
- ◆ Ability to track miscellaneous credit card transactions

The EnergyElite credit card system is designed to streamline and automate credit card reconciliation. With seamless integration with the general ledger, this module reduces the time expense of manual reconciliation and helps the user find problems quicker without wading through huge amounts of data.

Developed with you in mind for ultimate flexibility.
